# Demo Products 26/27

## Burton Snowboards

### Alekesam

Sizes: 148, 152, 156

An all-mountain board designed for a surf-like ride in all conditions. We worked with the legendary Selema Masekela to develop this new directional shape. Its surf-inspired design offers an all-mountain feel that any rider can appreciate.

### Custom Camber

Sizes: 154, 156, 158, 158W, 170W

From its humble beginnings, innovation has defined the Burton Custom Snowboard series and set it apart as the most popular, versatile, and mimicked board in snowboarding. Since 1996, this icon has reigned supreme while constantly evolving with a proven formula that combines time-honored design with next-gen ingredients to create a lightweight, poppy, and highly versatile board. Iridescent ink adds a shifting sheen to the graphic to match the board's legendary performance. The Custom Camber is the top choice for many Burton pro riders.

### Hometown Hero

Sizes: 152, 156W, 160W

We spend a lot of time poking around Vermont's tight trees and icy lines, so we built the Burton Family Tree Hometown Hero Snowboard to blast through it all. It's a daily driver with a build and materials worthy of the Family Tree name. The directional shape has enough taper to float the nose on deeper days, while the board's directional camber and flex maintain the pop to keep it lively in all conditions and terrain.

### FT Sketch Artist

Sizes: 151, 155

The age-old question: Is snowboarding an art or a sport? Ask a different rider, and you'll get a different answer, but the Burton Family Tree Sketch Artist Snowboard has a clear point of view. As the most freestyle-friendly all-terrain board in the line, its progressive sidecut, directional shape and flex, and substantial width make it a precision tool for aggressive expression wherever your mind's eye looks. Powder? Of course. Creative side hits? Visionary. Railing turns on your favorite groomer? Masterpiece.

### Yeasayer

Sizes: 140, 148

From unexplored peaks to your favorite parks, the women's Burton Yeasayer Snowboard tames anything that stands in your way. The board's PurePop Camber bend surfs through deep powder while keeping things stable underfoot, and a true twin design keeps you in control no matter which way you point it. A laundry list of features all work together to ensure that the ride is as friendly as it is fun, with an energetic core and a scoop tip and tail, which turn up the edges for a catch-free feel, whether you're surfing through knee-deep pow or sliding a box in the park.

### Blossom

Sizes: 149, 152, 155

A true twin for getting creative with a combination of camber and a carbon-reinforced core for extra snap and pop.

### Rewind

Sizes: 145, 148

With an extra poppy flex, the souped-up Burton Rewind Snowboard is for riders who charge hard and like a forgiving freestyle attitude. The flat, ultra-thin, and skate-like profile improves the ride, and encourages progression thanks to Filet-O-Flex design, yet it still rips harder than any soft board out there. It's the board that's always ready to give without sending you for a ride.

## Blizzard

### Anomaly 84

Sizes: 164, 170, 176, 182, 188

The Anomaly 84 is for skiers who love carving groomers but don't want a dedicated carving ski. It delivers outstanding grip, precision, and stability while remaining approachable and versatile enough for everyday skiing.

### Anomaly 88

Sizes: 164, 170, 176, 182, 188

The Anomaly 88 keeps everything skiers loved about the Brahma 88—grip, stability, confidence—and adds something the old ski lacked: maneuverability. It's one of the best all-mountain skis for advanced skiers who want carving performance without feeling locked into one turn shape.

### Rustler 9

Sizes: 162, 168, 174, 180, 186

A few seasons ago, Blizzard took one of the best skis out there and gave it more strength. The result? A more confident ride that grips better, charges harder, and still feels playful, energetic, and lively in bumps and trees. It's been a shop favorite ever since.

### Rustler 10

Sizes: 168, 174, 180

The Blizzard Rustler 10 is one of the best skis over 100mm wide. It feels stout underfoot over less than desirable terrain all while being more than easy to slash and slarve through tighter terrain. If you're someone who spends time all over the resort and ski on the East and West Coast this is one of those skis that is down for anything you throw at it.

### Canvas 100

Sizes: 162, 168, 174, 180, 186

The Canvas 100 is Blizzard's most playful ski ever. Lighter, softer, and looser than anything they've built before, it's designed for skiers who see the mountain as a playground instead of a race course.

### Black Pearl 84

Sizes: 146, 152, 158, 164

The Black Pearl 84 is one of the easiest skis to recommend for progressing skiers. It's smooth, predictable, easy to turn, and gives you plenty of room to improve without ever feeling intimidating.

### Black Pearl 88

Sizes: 146, 152, 158, 164

If you only demo one women's all-mountain ski, make it the Black Pearl 88. It's stable without being demanding, easy without being boring, and somehow manages to make almost everyone look like a better skier.

### Sheeva 9

Sizes: 150, 156, 164

The Sheeva 9 is perfect for skiers who spend their ski days all over the hill with a slight preference for groomers but with a more playful style, on the side of the trail, a few bumps here and there, and quick turns.

---

## Elan

### Ripstick 88 Black Edition

Sizes: 154, 161, 168, 175, 182

Everything skiers love about the Ripstick 88, now with significantly more stability, dampness, and carving precision. The Black Edition keeps the lightweight, playful personality of the original but raises the performance ceiling for stronger, faster, and heavier skiers. If you've ever wanted a Ripstick 88 with more backbone, this is it.

### Ripstick 96 Black Edition

Sizes: 168, 175, 182

The Ripstick 96 Black Edition remains the king of the all-mountain category. It delivers exceptional carving performance, surprising stability, and true all-terrain versatility without the weight or demanding nature of many competitors. If you're looking for a one-ski quiver that can genuinely do it all, this is still one of the best answers in skiing.

### Wingman 83ti

Sizes: 162, 169, 174

The 2027 Elan Wingman 83 Ti brings increased playfulness to the high-performance carving platform Wingman is known for. An entirely new shape and construction allow for quick and effortless initiation, intuitive and easy release from the turn, and reliable grip underfoot, for a ski that is strong and predictable in the best of ways.

### Ripstick 88 W

Sizes: 147, 154, 161, 168

The Ripstick 88 W remains one of the easiest skis in the industry to recommend. It blends intuitive turn initiation, confidence-building stability, and all-mountain versatility into a package that works for an enormous range of skiers. Stronger than before, but just as easy to ski, it's a ski that consistently makes people feel like better skiers.

### Ripstick 94 W

Sizes: 147, 154, 161, 168

The Ripstick 94 W is one of the most well-rounded skis in the women's category. More versatile and off-trail capable than the Ripstick 88 W, yet just as approachable and confidence-inspiring, it excels everywhere from groomers to trees and powder. If you're looking for a true one-ski quiver, start here

---

## K2

### Mindbender 85

Sizes: 156, 163, 170, 177

The K2 Mindbender 85 is the most accessible ski in K2's freeride-leaning Mindbender lineup, built specifically for skiers who want to break out beyond groomers without feeling overwhelmed. A lightweight wood core, a forgiving flex, and an all-terrain rocker shape add up to a ski that's intuitive to turn and steady when conditions get mixed.

### Mindbender 88

Sizes: 164, 170, 176, 182

The Mindbender 88 delivers the grip and precision of a frontside ski but with far more freedom and personality than most metal-laminate skis in the category. Think of it as a narrower, quicker version of the 101 rather than a narrower 96.

### Mindbender 96

Sizes: 168, 173, 178, 183

The hero ski of the collection. Smooth, damp, versatile, and capable of everything from carving groomers to blasting through crud and trees. If you're only buying one ski, start here.

### Mindbender 101

Sizes: 171, 178, 185

The Mindbender 101 takes everything skiers loved about the old 99 Ti and makes it more fun. It pivots easier, floats better, and feels lighter on your feet, yet it's somehow even more stable when conditions get rough. Dark Matter Damping isn't marketing fluff—it genuinely allows K2 to build a ski that's both calmer at speed and more playful off trail.

### Blur 74 MXC 12

Sizes: 155, 162, 169, 176

You know those skiers who skip lunch, eat their sandwich on the lift, and chase perfect turns from first chair to last? If that sounds like you, the Blur 74 is your ride. This short-turn machine delivers quick edge-to-edge control and effortless initiation at any speed—built for those who carve all day and don't look back.

### Mindbender 88 W

Sizes: 146, 152, 158, 164

The Mindbender 88 W delivers the grip and confidence of a frontside ski with the versatility and freedom of a true all-mountain ski. Quick, smooth, and easy to ski, it's one of the best everyday options for skiers who spend most of their time on firm snow but refuse to stay on the trail.

### Mindbender 96 W

Sizes: 153, 158, 163

Everything we love about the Mindbender 96, just lighter, softer, and easier to ski. One of the best true all-mountain options for skiers who want versatility without unnecessary effort.

### Blur 74 W

Sizes: 148, 155, 162

You know that moment when your legs tap out but your stoke's still high? The Blur 74 W keeps the good times rolling with quick turn initiation, solid edge grip, and an easy-going flex that won't burn you out by lunch. It's the sweet spot of performance and play all day versatility without the heavy legs.

---

## Line Skis

### Pandora 85

Sizes: 147, 154, 161, 168

As the intuitive hardpack specialist, the Pandora 85 is your go-to ski when the skies are clear and the snow is fast. With an incredibly lightweight and stable feel the Pandora 85 is perfect for frontside skiers who like to venture off the beaten path now and then.

### Pandora 106

Sizes: 169, 176, 183

The widest member of Line's refreshed Pandora Collection, the Line Pandora 106 is a versatile all-mountain ski with serious soft snow chops. An aspen veneer core, Bio-Resin construction, and Thick-Cut Sidewalls combine for a ski that floats in fresh snow without giving up edge grip on hardpack.

### Optic 88

Sizes: 156, 163, 170, 177, 184

Hard-snow performance gets the Optic treatment in the all-new Line Optic 88. An aspen veneer core, Gas Pedal Metal Overdrive titanal layup, and a tighter turn radius come together for the narrowest member of the Optic Collection, built for ripping corduroy and charging through crud.

### Chronic 94

Sizes: 164, 171, 178

Line's most versatile all-mountain freestyle ski, the Line Chronic 94 packs an aspen veneer core, Bio-Resin construction, Thick-Cut Sidewalls, and a Thin Tip into a 94mm waist platform. The result is a freestyle ski that can carve groomers in the morning and stomp jumps in the afternoon.

### Blend

Sizes: 163, 175, 180

The Line Blend Skis eat tricks for breakfast. Their soft flex, big personality, and twin tip design make the Blend ideal for freeride adventures in the park. Reinforced with carbon for a little extra strength, the Line Blend Skis rip the park all day and follow you home, throwing tricks in your dreams too.

---

## Nordica

### Enforcer 89

Sizes: 167, 173, 179, 185

The Nordica Enforcer 89 continues to be one of the best frontside-focused all-mountain skis on the market. It carves like a beast, holds an edge on firm snow, and still has enough rocker and forgiveness to make bumps, trees, and chopped-up snow genuinely fun.

### Enforcer 94

Sizes: 167, 173, 179, 185

The Nordica Enforcer 94 continues to set the benchmark for what an all-mountain ski should be. It delivers nearly all the carving performance of the Enforcer 89 while adding noticeably more confidence when conditions get soft, chopped up, or you decide to leave the groomers.

### Unleashed 106 CA

Sizes: 152, 157, 164, 171, 178

The Nordica Unleashed 106 is a completely new ski for 2027, replacing the Unleashed 108 with a more modern freeride personality. It's surfier, easier to slash, and more playful than its predecessor, but still carves shockingly well for a 106 mm ski. If you want one ski for soft snow that still rips groomers on the way back to the lift, this is it.

### Santa Ana 82

Sizes: 150, 155, 161, 167

The Nordica Santa Ana 82 is built for skiers who love carving but don't want to be limited to perfect groomers. Quick edge-to-edge, smooth at speed, and surprisingly capable in bumps, it's one of the most versatile frontside skis in the category.

### Santa Ana 87

Sizes: 150, 155, 161, 167

The Santa Ana 87 is one of the best skis in its class. It's stable, smooth and intuitive making it an awesome ski for all ability levels. It feels most at home on groomers and hard pack but isn't afraid to take a trip through trees, bumps, or tight terrain.

---

## Rossignol

### Soul 92

Sizes: 158, 166, 174, 182

The Rossignol Soul 92 is one of the easiest all-mountain skis you'll ever click into. Stable enough for advanced skiers, forgiving enough for progressing intermediates, and playful enough to make every run more fun. If you want one ski that encourages you to leave the groomers without giving up confidence on them, put this near the top of your list.

### Super Black Ops

Sizes: 162, 172, 182

A limited-edition release that channels Rossignol's vintage 7SK freeride spirit, the Super Black Ops is a powerful, versatile all-mountain freeride ski for skiers who want to charge anywhere on the hill. A 98 mm waist, twin rocker profile, and progressive sidecut make it a true do-it-all freeride platform, while the wood core with titanal layer reinforcement keeps it composed at speed without losing the playful feel. Bold cosmetics on a serious build.

### Forza 60ti

Sizes: 164, 171, 179

The proven, slightly more accessible version of its burly sibling, the Rossignol Forza 60 Ti still packs serious carving power into a refined, frontside-focused build.

### Arcade 84

Sizes: 152, 160, 168, 176

The Rossignol Arcade 84 skis redefine the all-mountain category with a personality that can literally ski 100% anywhere. Designed with advanced and expert skiers in mind, they balance a blend of race tech and freeride construction to create a new quiver-of-one experience. The combination of a shorter turn radius and a wider 84mm waist with a rockered tip and tail profile makes for progressive carving in all terrain. They're made for the snow you find versus the snow you expect to find, so you can carve and charge from first chair to final lap, all winter long.

### Arcade 78 W

Sizes: 132, 140, 148

A new width in the fantastic Arcade series, the Rossignol Arcade 78 W Skis + Xpress 10 Bindings offer the perfect blend of precision and forgiveness in a dedicated frontside ride. An ideal choice for your first ski after an introduction to the sport via rentals, or even your first ski period.

### Arcade 84 W

Sizes: 146, 152, 160

A fresh new face among the frontside specialists that will help you take your groomer game to the next level, the Rossignol Arcade 84 W Skis + NX 12 GW Bindings combine uncanny precision on edge with ease of use that will surprise you. Finding the fine line between edge hold and smooth turn initiation has always been the goal, and Rossi has hit it on the head with the Arcade 84.

### Soul 92 W

Sizes: 142, 150, 158, 166

The Rossignol Soul 92 W is one of the easiest all-mountain skis you'll ever click into. Stable enough for advanced skiers, forgiving enough for progressing intermediates, and playful enough to make every run more fun. If you're looking for one ski that encourages you to ski every corner of the resort without feeling demanding, the Soul 92 W should be on your shortlist.

---

## Stockli

### Stormrider 88

Sizes: 169, 174, 179, 184

This ski hasn't changed much over the years. and it doesn't need to. The Stöckli Stormrider 88 Skis remain one of the finest front side all-rounders ever made, and there's plenty of reasons to always keep a pair in your quiver. Their formula for success — Poplar and Beech core, two sheets of Titanal, and plenty of edge contact — sounds simple, but no one does it quite as well.

### Montero AR

Sizes: 165, 170, 175, 180

Built for skiers who love carving but don't want a full-blown race ski. Smooth, powerful, and ready to rip from the first turn.

### Nela 88

Sizes: 152, 160, 168

A smooth, confidence-inspiring all-mountain ski that feels at home everywhere. Easy to ski, hard not to love.

### Montero AW

Sizes: 150, 158, 166

premium performance without the attitude. Smooth, quiet, confidence-inspiring, and one of the easiest high-end carving skis you'll ever ski.
